Subject: EPA Kokomo Dump C564

To: Carey Stranahan, Engineer

City of Kokomo

Engineering Department

100S. Union St

Kokomo, Indiana 46901

The Wildcat Guardians have been intensely following with great interest the cleanup efforts of the city, IDEM, and EPA at the Kokomo Dump, C564, 1130 S. Dixon Road, Kokomo, Indiana. The removal of five leaking drums of unknown chemicals is a good thing for the Wildcat Creek and surrounding neighborhood. The past history of this location, as an unregulated dump, strongly suggests that there may be other environmental issues hidden in this area.

It is our understanding that the City Of Kokomo and representatives of Howard County are discussing the need for future actions at this site and the serious erosion taking place on the south bank of the Wildcat 200 yards upstream of the Dixon Road bridge. We heartily support this activity and any others that address these and other environmental issues regarding the Wildcat Creek. The Guardians would like to be kept in the information loop and, if possible, included in these discussions.

The Wildcat Creek is a valuable asset for our community and must be protected, maintained and improved. Please keep the Guardians informed and/or involved in this discussion and the processes of protecting “our” creek.

Yours truly,

Bob Hoshaw, President

Wildcat Guardians
